CHANGE IS COMING

RESHAPING
Your Health Care Organization for 2016 with C.O.R.E.!

A culture of success and engagement can create an organization built to withstand and adapt to the ever-changing health care landscape. Managers and leaders are a critical aspect of the productivity and results and when they are ready to tackle new challenges, their teams and the organization benefit.

C.O.R.E. Leadership program was created to help leaders build upon the management basics and learn the competencies needed to create a positive culture of leadership. This immersion program was not designed as a lecture series, but rather an opportunity for a leader to engage and interact with the facilitators and colleagues. C.O.R.E. offers six in-seat sessions, pre-recorded and live webinars, practical application assignments and one-on-one coaching following the completion of the program.
