

CMS Pharmacy & Medication; Complying with Hospital CoPs & Proposed Changes

Program Overview

During this session, information will be provided on the top problematic pharmacy standards by CMS. CMS is now issuing a deficiency report showing when the pharmacy is cited for being out of compliance. The CMS interpretive guidelines address medication management and pharmacy related standards. These can be looked at when CMS conducts a complaint or validation survey. Medication management is not only a big issue with CMS but also with the Joint Commission. Medication errors are the largest number of medical errors in healthcare today. They are also the most common reason for unnecessary readmissions to the hospital.

One important point to note, it is important for the nursing personnel to understand the medication and pharmacy standards since many of them apply to nursing. For the first time, CMS mentions that nursing needs to be aware of some of the pharmacy standards and vice versa. This includes medication errors, adverse events, and drug incompatibilities, self-administered medication and required medication policies.

Program Objectives

At the completion of this program, the participants will be able to:

1. Explain how all hospitals that receive Medicare/Medicaid reimbursement must follow the medication guidelines for all patients.
2. Identify the CMS requirement for beyond use date (BUD) and compounding.
3. Identify the number of CMS pharmacy policies and procedures.
4. Describe the CMS requirement for a policy on high-risk drugs such as double checks or dose limits.

About the Speaker

Sue Dill Calloway has been a nurse attorney and consultant for more than 30 years. Currently, she is president of Patient Safety and Healthcare Education and Consulting and was previously the chief learning officer for the Emergency Medicine Patient Safety Foundation. She has conducted many educational programs for nurses, physicians, and other health care providers. Sue has authored over 100 books and numerous articles. She is a frequent speaker and is well known across the country in the area of health care law, risk management, and patient safety. Sue has no real or perceived conflicts of interest that relate to this presentation.

Who Should Attend

Anyone involved in the medication process especially pharmacists, physicians, all nurses and nursing supervisors, patient safety and risk management staff, performance improvement personnel, Joint Commission staff, compliance officers and others who participate in the medication process.

WEBINAR

DATE/TIME

Tuesday

January 17, 2017

10:00 AM - 12:00 PM EST

REGISTER
NOW

PROGRAM FEE

Webinar connection for MHEI Members: \$175

Webinar connection & CD recording of the webinar for MHEI Members: \$250

Webinar connection for Non-MHEI Members: \$300

Webinar connection & CD recording of the webinar for Non-MHEI Members: \$375

Registration fee covers one connection per registration.

Multiple participants can view the webinar. Payment must be received before connection instructions will be sent
