

The Leadership Challenge: Driving Results

Program Overview

Leadership is learnable, measurable and teachable! Evidence based leadership research often holds the key to assisting us in becoming exceptional leaders who get results. However, the struggle for many managers is having the time to explore proven leadership strategies and develop them into leadership actions that are realistic and practical. In this program, MHEI does that work for you. Based on the classic research of Kouzes and Posner in *The Leadership Challenge*, this program distills the practice of results-oriented leadership down to a handful of workable strategies applicable to any health care setting.

Program Objectives

1. Explore 5 practices of exemplary leadership
2. Analyze leadership actions that will enable you and your team to reach organizational and departmental goals
3. Apply leadership strategies to a current organizational challenge

About the Speakers

Katrina Coleman, BSN, MSN, has been in the health care industry for 20 years during which she has consulted and coached with hundreds of managers assisting them in developing and implementing skills to help them achieve their goal of running a productive and quality-driven department/unit. As a master's prepared nurse and an ATD-Certified Coach with many years of hospital experience behind her, Katrina understands the needs of leaders and staff as well as the environment in which they operate. Katrina's goal is to assist others in using their own talents and strengths to create quality outcomes.
