

Leading with Emotional Intelligence

Program Overview

Leadership is relationship and great leadership works through emotions. Research connecting higher levels of emotional intelligence to effective nursing leadership supports the need for personal growth in increasing one's self-awareness, self-management, social awareness and relationship management. This interactive session explores Daniel Goleman's work in emotional intelligence and the powerful role of emotions in the workplace, especially on nursing units. By the end of this session, participants will define the components of emotional intelligence and identify strategies that set the best nurse leaders apart from the rest – not just in tangibles such as better unit results but also in the all-important intangibles, such as building relationships, motivation, engagement and commitment to achieve high-quality, safe patient care.

Program Objectives

1. Recognize the core components of Emotional Intelligence
2. Explore what research has found about the unique contribution of emotional intelligence to high performance leadership, especially in nurse leaders
3. Identify at least three strategies on using emotional intelligence to manage conflict and drive results

About the Speaker

Lyndley O'Dell, MS is a healthcare human resources professional with experience in various aspects of HR including talent acquisition, onboarding, employee engagement, employee relations, performance management and organizational development. Lyndley has experience partnering with healthcare leaders and guiding them through challenging situations as well as managing an HR team. Lyndley is passionate about building collaborative relationships and offering customized strategies to help leaders and staff achieve results. In addition to holding two HR certifications, Lyndley is also certified through ATD's Improving Human Performance program.

This educational activity is jointly provided by AXIS Medical Education and MHEI.
