## THE PRACTICE OF Leadership for Physicians

The Maryland Healthcare Education Institute (MHEI) is offering The Practice of Leadership to physicians as a leadership development experience preparing them for the complex role of leading groups of individuals responsible for accomplishing critical strategic goals within constantly changing organizations.

As highly educated individuals and clinical experts, physicians are assuming more formal and informal leadership roles within our increasingly complex healthcare organizations where working with a diverse and varied workforce is essential for achieving success.

This four day seminar uses the best of Adult-centered learning principles and techniques including:

- Facilitated discussions
- Real world experiences
- Application of theories and tools
- Current issues and problems

In addition to these techniques, participants will also have the opportunity to:

- Network and problem solve among colleagues
- Resolve real-time issues and challenges

The Practice of Leadership program helps these leaders by enhancing their ability to use their own Emotional Intelligence to emerge as credible leaders able to appropriately engage their peers, hospital leadership and the organizational workforce in a manner that promotes self-awareness, accountability, and team success.

Key Components include understanding and skill-building around:

Leadership Awareness and DISC Assessment

Credibility, Values and Paradigms

Engagement, Communication and Courageous Conversations

Culture, Change, Accountability and Resilience (Tools to beat Burnout)

For questions about registration, pricing and customization of educational offerings, please contact Alison Burrows:
